

The City is determining how many carts will be needed for Phase II of the Zero-Sort recycling program, which includes larger buildings. Until further notice, residents in buildings with 7 or more units may continue to use their current small blue recycling bins or the larger recycling carts previously purchased from the City. If you have already picked up new Zero-Sort carts, you should continue to use those. Buildings with 7 or more units will be phased into the Zero-Sort program at a later date and residents will be informed as soon as that date is determined. If you have any further questions, please contact 311 for more information.
